

**AMENDMENTS TO THE SPECIFICATION**

Please delete the existing Abstract and replace it with the following replacement Abstract:

~~The present invention relates to subterranean well stimulation. More particularly, the present invention relates to improved methods of stimulating subterranean formations during drilling operations.~~—In some embodiments, ~~the present invention discloses~~ methods of stimulating a section of a subterranean formation comprising (a) forming at least a portion of a well bore that at least penetrates a section of the subterranean formation using a drilling operation; (b) ~~stimulation~~ stimulating a section of the subterranean; and (c) continuing the drilling operation are disclosed herein. In other embodiments, ~~the present invention discloses~~ methods of ~~stimulation~~ stimulating a section of a subterranean formation comprising (a) forming at least a portion of a well bore that at least penetrates a section of the subterranean formation using a drilling operation; (b) stimulating a section of the subterranean formation; and (c) continuing the drilling operation are disclosed herein.
